

other day. The other number was 209 I think the other day, and I thought that, according to our discussion that day, that 209 was the current regulation so I guess my question is, does this then apply to cars that are manufactured today under 209's regulations?

SENATOR SCHMIT: Senator Vickers, the language and the materials on 209 are incorporated in 208, my aide tells me.

SENATOR VICKERS: 208 includes the standard in 209 that you were referring to the other day?

SENATOR SCHMIT: That's right.

SENATOR VICKERS: Is that correct?

SENATOR SCHMIT: That's right.

SENATOR VICKERS: Okay, thank you. Thank you, Senator Schmit. I'm going to vote for the amendment, but I would just remind the body that I think this bill is so misunderstood at this point that even the proponents, even the introducers don't exactly know what the standards are or what the requirements are as they put it in the statute. Possibly a motion to bracket this bill till January and let us think about it for a while might not be a bad idea. Thank you, Mr. President.

SPEAKER NICHOL: Senator Chambers.

SENATOR CHAMBERS: Mr. Chairman, I'd like to ask Senator Morehead one question. Senator Morehead, do you support this amendment?

SENATOR MOREHEAD: Yes, I do.

SENATOR CHAMBERS: I have met the enemy and they are mine. I, then am going to support this amendment too, but I'm supporting it only because Senator Morehead supports it too. I'm going to try to get some additional strength for my position. Senator Goll, may I ask you a question?

SENATOR GOLL: Am I also yours, Senator Chambers?

SENATOR CHAMBERS: I have to find out. Do you support this amendment?
